

SINGLE ACCESS POINT CONTROL

Indoor/Outdoor Narrow Digital Keypads

923PW Weigand Output w/ Prox	923P Self-Contained w/ Prox	923 Self-Contained
---	--	------------------------------

WHAT YOU NEED TO KNOW:

SDC self-contained digital keypads are designed to control a single access point up to 500 users. All EntryCheck® keypads are uniform keyboard programmable for convenience and select models are available with optional HID proxcard or proxkey fob compatibility for selected models

The EntryCheck® standalone digital access control family of keypads assigns each user a personal identification number (PIN). Keypad entry of a valid one to six digit code activates one or both of the output relays which releases an electric door lock.

Each keypad comes with four outputs, two relay and two solid state outputs timed or latching (on/off) and also has a request-to-exit input for connection to an exit switch and/or fire access key switch for fire/emergency access. The tactile keys provide loudness selectable audible volume for key depression or output activation.

HOW YOUR CUSTOMER BENEFITS:

- Uniform keypad features
- Keypad programmable
- Digital keypad with backlit keys
- 12-key illuminated, moisture-resistant keypad
- Weather and vandal resistant housing with tactile keys
- Built-in tamper switch
- Visual status indicators (LED)
- 12/24 VAC/DC input
- Narrow surface, mullion or frame mount
- Request-to-exit (REX)
- 3 user modes - PIN or card, card only, card and pin*
- Weigand output model available

* P/PW proximity integrated keypads only.
