

## STANDALONE ACCESS CONTROL

Electronic Battery Powered Cylindrical Locksets

**E75PS**

Keypad, Prox & Software

**E75P**

Keypad w/ Prox

**E75K**

Keypad Only

**E75PL**

Privacy w/ Prox

**E75KL**

Privacy Only

### WHAT YOU NEED TO KNOW:

SDC's E75 series standalone electronic locksets are a simplified solution requiring no wires, fewer components, less labor and less cost for access control of a single door up to 3,000 users.

**Power is provided by four size AA batteries, good for 100,000 cycles.** Vandal resistant lever handles provide reliability and longevity.

**E75KL and E75PL models feature a privacy function that's perfect for new or retrofitting of gas station, convenience store, fast food, coffee house or retail store restroom facilities.** Customers or employees can be provided an access code to enter on the keypad to access the room. Once inside with the door closed, simply push the red button to activate the privacy function. The red LEDs on the outside keypad and inside battery cover flash to indicate occupation. Activation of the privacy mode locks out the keypad. When turning the inside lever to leave, the privacy function is deactivated and the lock is ready again to accept another user.

Signage clearly indicates status and function, so no user instructions are required. Management can override the privacy function in case of emergency or to clear room occupants who have overstayed their welcome.

### HOW YOUR CUSTOMER BENEFITS:

- Low cost, easy installation
- No wiring - no power supply
- Mechanical key or master code override
- Battery powered (4AA)
- Battery lifespan allows for 100,000 uses
- HID ProxCard or ProxKey fob compatible (E75P / E75PL)
- Keypad programmable
- Indoor/outdoor - weather & vandal resistant
- Blue backlit cast metal keys
- Optional PC-based software (E75PS)
- Optional privacy feature (E75KL / E75PL)
